Snopake[®] | since 1955

because to err is human

Welcome to the *Snopake*[®] | brands 2023 catalogue

Our History

Our roots go back over 65 years to 1955, when Snopake, one of the world's first correction fluids, was introduced by the Battelle Institute of America. In 1988, we developed the first, hard wearing polypropylene filing product to the stationery market and Snopake Ltd was born. This was successfully followed in 2005 by Swordfish, a range of high quality but affordable Paper Shredders, Paper Trimmers, Pencil Sharpeners, Laminators and, more recently, Electrical Accessories.

Over 100 years of Platignum

2020 marked over 100 years of Platignum. Starting in 1919 as Platignum Pen Co. the world of pens changed with the self-filing gold plated nib fountain pen. Platignum then created the retractable ballpoint in 1950 and has continued its innovative streak with a range of ball point and fountain pens.

Over 100 years on, Platignum continues to write the history of the pen.

Today

From our Head Office in London, and distribution centre in Suffolk, we market our products in over 70 countries. We believe in excellence and practise a continual process of improvement and innovation. Our business is built on integrity. We follow clear ethical guidelines and strictly enforce them throughout the company. Our culture is defined by an entrepreneurial spirit that is pervasive and global. We encourage our people to make an impact, to take action and responsibility.

Our Products

We are passionate about our products; we thrive on superior product innovation and never compromise on quality. Our products are backed by guarantee and have been manufactured to the highest standards so that they remain cost effective purchases over the longer term.

Sustainability

Snopake Brands recognises its responsibility to conduct business in a way that protects the environment. We believe we have an important duty to ensure good environmental performance in all our business operations and to provide the necessary organisation, commitment and training to fulfil this obligation. The management firmly believes in, and is committed to, monitoring and improving environmental performance, pollution prevention and environmental protection.

At Snopake we never compromise on quality and have you, our customer, to thank for the success of this Company. If however, you haven't chosen a Snopake Brands product previously, try us - put us to the test.

Snapake®

What makes a Snopake product stand out from the crowd?

Six decades down the line, Snopake products are recognised as the market leader in polypropylene filing, storage and presentation products and clearly lead the way in the office product sector.

The brand's main product focus is to develop high quality, functional, affordable but trusted products for everyday use. The Snopake portfolio ranges from desk-top essentials such as sticky notes, glue and correction through to display books, ringbinders and filing & storage products.

Today, with the age of technology, one wonders whether correction products are still required but, in fact, our correction products are still used for correcting hand-written mistakes in the office, at school or at home.

Each product is meticulously created, details such as extra strength, durability of the product, unique Snopake features, such as closures and indexing, are thought through at every stage of the development process. We listen to our customers, because it's important, but also because we want our customers to enjoy the Snopake experience.

Because we truly believe in our products, each filing or storage product has a product promise guarantee of between 2 to 10 years. Before going to market, each Snopake product must pass the 5 Step Fitness Test to ensure they are not only fit for purpose but, most importantly, last longer than their product promise guarantee. Each product is tested for strength, durability, usability, affordability and sustainability before it is deemed fit for purpose and awarded the Snopake product promise guarantee.

Our best selling product is the Snopake Polyfile.

Launched in 1995 as an alternative to the manila folder, our data shows that a Polyfile is sold every 6 seconds somewhere in the world. Available in sizes from DL, A5, A4, Foolscap and A3, the Polyfile comes in Clear, Classic, Electra, Fusion and more recently in Rainbow colours. Featuring a press stud closure to keep contents secure, and a handy indexing system unique to Snopake, each Polyfile carries a product promise guarantee of 5 years!

Snopake celebrate over 60 years of dedication, pride, perfection and success. We hope you'll join us as we continue our journey, our continued commitment to quality, our dedication to innovation but, above all, our commitment to you, our customers.

Product Information

ENVIRONMENTAL TERMS

Biodegradable

Biodegradable materials are capable of being decomposed by natural processes. The ability of a material to biodegrade depends largely upon its molecular structure. When disposed of, some materials degrade in only a few weeks, while others take several months or even years.

Recycled

Recycled materials have already been used before and renewed for further use. At Snopake, we only ever describe products as recycled if a significant proportion of the material has been used before.

Recyclable

Recycling is the process of converting waste materials into new materials and objects. It is an alternative to waste disposal that can save material and help lower greenhouse gas emissions. Recycling can prevent the waste of potentially useful materials and reduce the consumption of fresh raw materials, thereby reducing: energy usage, air pollution and water pollution.

At Snopake we only ever describe products as recyclable if a significant proportion of the material is recyclable.

MATERIALS

PP

Polypropylene is made from propylene and ethylene – two waste products of the oil and gas industry. Until the invention of polypropylene, these waste products were simply burnt as they had no commercial value. Today, polypropylene is one of the most widely used plastics in the world it is robust, extremely durable, water resistant and recyclable.

LDPE

Low density polyethylene is a lightweight thermoplastic made from the monomer ethylene. Flexible, moisture-resistant and recyclable.

EVA

Ethylene vinyl acetate is the copolymer of ethylene and vinyl acetate. It's an extremely elastic material that produces materials which are rubber-like in softness and, yet with excellent toughness and flexibility. The porous elastomeric material is three times as flexible as low-density polyethylene and is a recyclable material.

EPPE

EPPE means **EVA+PE+MPE**. It is one of the synthetic polymer chemical materials that are between PE and EVA material. EPPE has a high transparency, high softness and toughness and a low temperature resistant (-50 degree). It is non toxic, phthalate free, pollution-free and a recyclable material.

FSC®

All our paper products carry the FSC® logo to show that their materials came from sustainable forests.

Colours & Finishes

Electra Polypropylene

The Snopake signature colour range that includes stunning green, turquoise, purple, pink and blue colours.

Classic Polypropylene

A popular and timeless range of more subtle colours including blue, yellow, green, red and clear.

Polka Dot Polypropylene

An exciting range of stunningly bright colours including pink, teal, blue, orange, purple, green, red and light yellow.

Fusion Polypropylene

An elegant range of fashion led colours including Burgundy, Smoke, Emerald, Indigo and Plum.

Neon Notes

A range of extremely bright or fluorescent colours, which can include yellow, green, pink, orange, blue and purple.

Zeon Polypropylene

A collection of fabulous metallic black, blue, graphite, green and red colours.

Bright Polypropylene

A range of bright colours which include green, pink, purple, white and yellow.

Lite Polypropylene

A combination of unique light colours which include parchment, light blue, dark blue, pink and purple.

Rainbow

A wonderful combination of striking colours which include blue, orange, green, red, purple and yellow.

Superline Emboss

The majority of Snopake polypropylene products have a Superline emboss - this attractive finish has a professional look and feel.

Frost Emboss

A frost emboss is ideal for regularly handled products as it is smooth to the touch, providing added comfort.

A-Z of Product Icons

Unique Snopake guarantee

The weight of usable product in grams

Can be used for organising and indexing documents

CORRECTION

Snopake has been correcting mistakes since 1955 - In fact, we were one of the world's first correction fluids! Originally used for correcting typing mistakes, today our correction products are mainly used to cover handwriting mistakes. Available in fluid, pen or roller, Snopake correction has the correct solution for your needs- whether they be large or small!

NOTES & TABS

Snopake Notes and Tabs are a must have in the home, school or workplace. From leaving reminders on desks or around the home, it's always useful to have a pad of Snopake Sticky Notes to hand.

Each Sticky Note is produced to Snopake's highest standard, ensuring you get the best possible product. Our Sticky Notes can be easily removed whilst retaining their stickiness, so you can reposition them over and over again.

Our brightly coloured Index Tabs are also an essential accessory, from highlighting text to revision page marking to emphasising those small yet important notes, our range of Index Tabs are handy to all.

- Notes repositionables
- Haftnotizen • Notas adhesivas
- Notas adesivas • Samoprzylepne karteczki
- Яркая неоновая клейкая бумага для заметок

AirBag

Since November 2006, European Legislation demands that liquids carried on board an aircraft must be packed in a clear, resealable bag, approximately 20 x 20cm in size.

- Snopake Airbag meets the requirements of this legislation.
- The legislation affects all European flights and has been adopted at many international airports
- Made from tough, long-lasting flexible material
- With smooth action plastic closure and metal slider

POLYFILES

The Snopake Polyfile, launched in 1995, is the original envelope-style popper-wallet - it's often copied but never excelled. Snopake Polyfiles are made from tough polypropylene, much stronger than the material used by many competitors, and the press-stud closure is engineered to last.

Snopake Polyfiles are ideal for securing all your important documents, photographs and artwork, whether at home, in school or the workplace.

Uniquely, only Snopake Polyfiles have double-welded seams, making them the toughest files of this type available - anywhere! The Snopake Polyfile is durable, elegant and resourceful - it's no wonder one is bought every 6 seconds!

The Polyfile is available in a wide choice of clear, vibrant and soft clear pastel colours, designed to suit your every need.

The Classic and Clear Polyfile range feature an indexing system - unique to Snopake, allowing you to label each Polyfile for easy identification. This is yet another Snopake innovation - you won't find this on any similar-looking files.

Polyfile

The Snopake Polyfile was launched in 1995, as a tough, elegant and environmentally-friendly alternative to the manila folder. Manufactured from tough, long-lasting polypropylene, it is easy to wipe clean and is available in an array of vibrant colours and soft clear pastels. Complete with a coloured press-stud that ensures that documents stay safely inside the folder.

Did you know that a Snopake Polyfile is bought somewhere in the world every 6 seconds?

We've done it again!

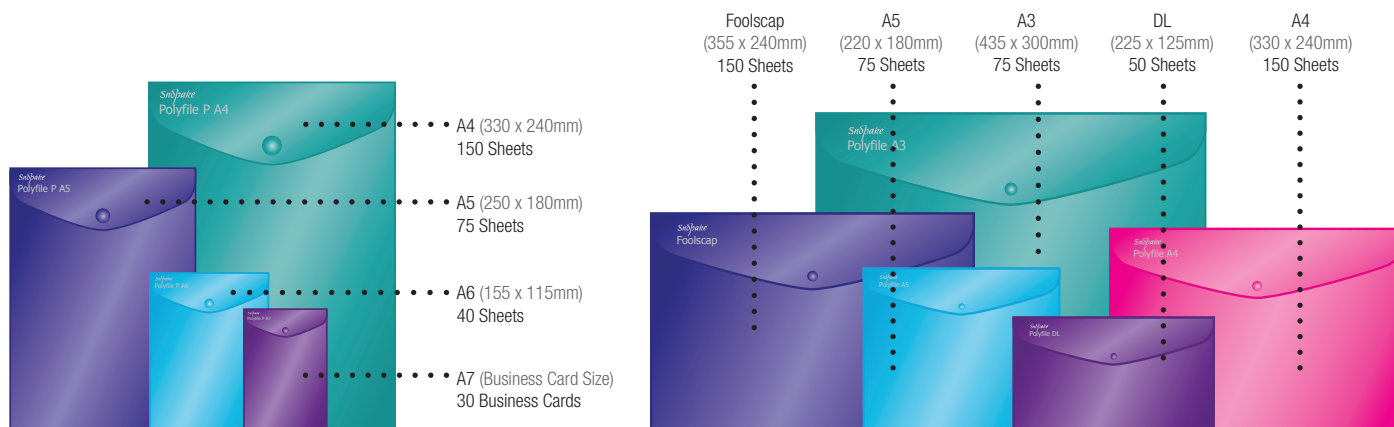

Now after 22 years of global success, there's a new Polyfile. Unlike any other, the seams are double-welded for ultimate strength and security.

Polypropylene is one of the most widely used plastics in the world it is robust, extremely durable, water resistant and recyclable.

Available in sizes from A7 to A3, there is a Polyfile to meet all needs - from storing documents, artwork, CD's and photographs to holding business cards.

The Unique Snopake Indexing System
(Clear and Classic only)

NOTEBOOKS & DISPLAY BOOKS

Snopake Display Books are sure to impress in any circumstances. The versatility of our display books means they can be used for presentations, for interviews, for filing contracts but can also be used around the home for storing menus or important household documents in an easy to read format. Made from tough polypropylene, our display books have wrap around spines for easy identification and labelling as well as a variety of pocket sizes. We actually have display books that are A5 and A4 in size but can store A4 and A3 paper - that's what we call flexibility!

Snopake® RECOMMENDS

RINGBINDER ACCESSORIES

Snopake offers a vast array of RingBinder accessories that are designed to suit virtually any RingBinder or lever arch file. They are available in portrait or landscape, in a variety of colours & sizes and the reinforced, multi-punched edge suits most binding mechanisms.

Every accessory is made from top quality, high strength polypropylene and offers long term protection for your documents or assistance in retrieving those all important documents.

Unlike other brands, Snopake's Polyfile Wallets are double-welded for extra strength and greater durability – another first from Snopake!

EXPANDING FILES & ORGANISERS

Snopake offers a complete range of Expanding Files & Organisers that are suitable for use on your desktop, carrying around or even for use when travelling.

Unlike other desk organisers, Snopake manufactures its products using thick and long-lasting polypropylene providing you with robust and durable business stationery, without compromising on design and style.

Each Expanding File & Organiser is available in landscape or portrait orientation, different sizes, colours, expanding sections, or with/without carry handles, tailored to suit your every need.
